

Natural Resource Tourism

Warner College

The Natural Resource Tourism major has two concentrations: Global Tourism and Natural Resource Tourism. Both of these prepare students to contribute to the enjoyment of natural and cultural resources in such a way as to promote sustainable tourism practices, both nationally and internationally. Graduates in Global Tourism may work abroad in private, for-profit enterprises that provide services to tourists using their language and culture skills. Natural Resource Tourism graduates may pursue careers in natural resource related tourism positions in the private, public, and non-profit sectors.
